	Carol Kittel	ckittel@hotmail.com	496-2160	X
	Kevin Wood		544-2079 cell	X

X= member present at meeting

1. Wood chips for the playground have been ordered and will be delivered on Wednesday. Providence Academy will provide the labor to spread the chips.
2. Question was raised if the underground volleyball posts have been located and removed? Wayne thinks there is about 6" of dirt over the underground supports so there shouldn't be anything to worry about. Kevin hasn't seen them when he was cutting grass.
3. St Joe's has a canopy and is available for the taking if it can be used. The length is too big for what St. Jude would have wall space for. Gary will call Jones Sign to see if they can cut and modify to see if we can install over the west church doors and the east doors to the basement. If it can be modified, Gary to get in touch with Carol.
4. The concrete sidewalk along Kellogg St. will look at removing in early October. Wayne will talk to Larry about use of a truck. Wayne will look into the Bobcat. Possibly set it up for a Saturday and ask for volunteers in the bulletin. Removed sidewalk area to receive topsoil and grass seed.
5. When quotes are received for work in the future and parish members quote, we will make an attempt to have a spec to follow first to establish a standard and after quotes are received they will be reviewed and members will be allowed to explain what is in the quote to make sure we are comparing apples and apples with out side vendors.
6. The church steps out of the sacristy are falling apart. A budget number will be put together for this work to be included in the next years budget. Also include the sidewalk replacement to the old parish center which has a section sinking.
7. Dave will get a roof plan to Wayne of the old parish center so a budget number can be received for reroofing this building.
8. The old parish center should also look into replacing or repairing the windows with possibly vinyl or fiberglass. Dave will look into the fiberglass and Gary will look into the vinyl windows for budget numbers.

9. Dave will contact building and grounds members who haven't attended a meeting in over a year to see if they are still interested in belonging to the group.
